New Consult Note template:

1. Click on “power note” and “+add”
2. Select the tab “Catalog”
3. Scroll down to “Geriatric Medicine” and click on the “+” to open the options in that folder. Select “Geriatric Medicine Initial Consult Note”

Reminders of components that MUST be completed for new consults
1. Patient’s primary team—if not sure, ask attending
2. Patient’s primary attending—will be the name listed in the “Att: _____” section in the top right of the patient’s info in the blue banner
3. Reason for the consult (i.e. delirium, cognitive impairment, falls, polypharmacy, etc)
4. Family and Social history must be completed. If patient is not able to tell you and there is no family to tell you, then write “unable to obtain 2/2 patient’s clinical condition”
5. Review of systems and exam must be filled out on all new patient consults

Follow-up consult notes can be a regular progress note with the title “Geriatric Consult Progress Note”
